UI/UX Design

- High fidelity, low fidelity wireframes, Prototyping, and User process.

UX Research

- Design thinking process, Usability Testing, Research plan, and User research.

UI/UX Development

- Bootstrap, Box models, and styling web pages.

Internet of things(IoT)

- Design thinking process, and Flow Charts.

REFEREES

Linda Kamau,

+254723674180,

Co-Founder and Managing Director,
AkiraChix.

James Mwai,

smartemwa@gmail.com,

CTO,

Sky Garden.

Wycliffe Baraza,

+254711238727,

wycliffe@resilienceaction.net,

Program Manager,

Resilience Action International.

AISHA FADALLALA

SOFTWARE DEVELOPER

PERSONAL PROFILE

Aisha comes from the northern part of Sudan, a country that is yet to make any advancement in the field of Technology. Aisha is a self-driven software developer, she strongly believes through her tech skills she is able to contribute and solve pressing sole issues affecting her community. She continues to grow and expand her scope of tech knowledge while developing applications.

TECHNICAL SKILLS

- Able to use Html, CSS, and Bootstrap to develop static and responsive web applications.
- Able to use the Django framework to build websites applications.
- Capable of handling Views, models, Forms, and URLs in the Django framework.
- Ability to work with Object-oriented programming in python.
- Understanding Python basics such as data types, lists, tuples, and dictionaries.
- Able to use Javascript and react to create front-end web applications.
- Capable of storing data and hosting websites using GitHub and Netlify.
- Ability to use Kotlin to develop mobile apps using android studio.
- Ability to carry out UX desk research on a given issue and generate reports.
- Able to design websites and mobile apps using Figma and Adobe illustrator.

WORK EXPERIENCE

Field supervisor - Project Manager

Resilience Action International (RAI) in Kakuma Refugees Camp-Kenya.

5/2019 - 1/2021

- Worked for We Share Solar(WSS) Under RAI as a field supervisor for solar and computer management.
- Trained 30 youth on computer packages.
- Managed the company's social media accounts
- Completed a full solar installation training with WSS. Through the training, she managed to coordinate one-month solar installations for refugees in schools and communities.
- Attended a Community development and youth building by Xavior Project and UNHCR.
- Assisted customers with downloading, printing, scanning, and emailing documents.

PERSONAL PROJECTS

- PictureBook-Mobile app:

Built an app that stores photos using Kotlin language.

https://github.com/fadallalaisha/My_Photos

- School system in Django.

Built a school system to store data for the trainers and students in the school.

<https://Schoolsystem.com>. Also building an app to help customers to order

fruits and juices online. <https://github.com/fadallalaisha/photos>.

- Website-Javascript, HTML/CSS:

Built her portfolio using programming languages to help her present all the technical skills.

- Coffee App-Mobile app:

Worked on field research on Kenyan coffee to know the issues faced by coffee lovers in Kenya and how coffee is been practice as a culture.
