

Back ground.

Often bodaboda riders get either minor or critical injuries from either falling due to bad roads or colliding with other riders and drivers and this is unfortunate because these riders are mostly bread winners in their families meaning if any of them gets hurt it affects the whole family. Being part of a community that has experienced this problem we had the insight and came up with the problem statement below.

Bodaboda riders will benefit since they are going to be protected from accidents minimising the number of injuries they get.

- 1.lighter and comfy rider wear
- 2.Temperature sensors in the helmet
- 3.speed regulators

Question 4

- Nairobi
- hostility and rebellion from the bodaboda riders
- lack of adequate funds.
